

Your clients ask for the big Microsoft projects. We deliver them, under your name.

TwoBridges is two hands-on Microsoft 365 engineers. We run migrations, security hardening and Copilot readiness for IT support firms that would rather not hire for one-off project work. You keep the client and the support contract. We do the project and hand it back.

Projects we take off your plate

Migrations

Google Workspace to Microsoft 365, tenant to tenant after a merger or acquisition, file server or Dropbox to SharePoint, hosted Exchange to Exchange Online. Planned, scripted and done over a weekend cutover.

Security and health checks

Entra ID, Conditional Access, MFA, Defender, Intune baselines and licensing, delivered as a scored report and a fix list your team can keep running.

Copilot and AI readiness

Oversharing and permissions clean-up, sensitivity labels, a pilot group, training and an adoption report, so your client can switch Copilot on safely.

Azure and cost

Secure Azure foundations built as code, Azure Virtual Desktop, and Azure or M365 cost reviews with a savings plan.

Three ways to work with us

White label

We work as part of your team, under your brand and email. Your client never needs to know we exist.

Alongside

You introduce us as your specialist partner. You stay the account owner throughout.

Back-up for your engineers

Day-rate help on tricky tickets, design reviews or a second pair of hands on your own projects.

How it works

- **Fixed price, quoted to you.** We scope the job and give you a fixed partner price, so you add your margin and sell it on.
- **Repeatable delivery.** Our own migration and audit tooling makes cutovers predictable, and you get full documentation.
- **Clean handover.** When the project ends, your team runs it, with as-built notes and a walkthrough.
- **Easy to start.** Bring one live opportunity, or one client stuck on a migration, and we'll scope it for free.

Our promise to partners

- We never sell IT support or managed services to your clients.
- We never approach your clients directly, during or after a project.
- You own the relationship and the billing.
- We're happy to put this in a simple partner agreement.

Got a project you've been turning down?

A 20-minute call is enough to see whether we can help.
